SUMMARY

Self-taught Android and full-stack developer specializing in building intelligent, user-centric applications. Proficient in Jetpack Compose, Firebase, React, and Node.js with proven ability to independently develop and deploy complete MVPs from concept to production using modern, cost-effective tooling.

EDUCATION

Bachelor of Science in Political Science

University of Abuja — 2016–2021

PROFESSIONAL EXPERIENCE

Freelance & Personal Projects Developer

Remote — 2022–Present

- Design, develop, and deploy Android and web applications using modern frameworks including Jetpack Compose, React, and Node.js
- Built full-stack MVPs independently, integrating frontend interfaces with backend services and cloud infrastructure
- Architect scalable, production-ready solutions optimized for real-world constraints and user experience

Business Development & Social Media Lead

Animation Studio, Abuja — June 2023 – November 2023

- Managed digital campaigns and earned Meta Social Media Marketing certification
- Developed content strategies that significantly increased engagement and brand reach

Volunteer Digital Literacy Educator

Self-organized, Rural Nigeria — August 2020 – December 2020

- Designed and delivered curriculum teaching digital skills to underserved communities using Google Classroom

TECHNICAL SKILLS

Languages: Kotlin, TypeScript, JavaScript, Python

Frameworks: Jetpack Compose, React, Node.js

Tools & Platforms: Firebase, PostgreSQL, Android Studio, Git

Specializations: REST API Design, UX Collaboration, AI Integration

FEATURED PROJECTS

MealFlow — Android Meal Planning Application

Full-featured recipe and meal planning app with Firebase backend and Jetpack Compose UI. Engineered innovative zero-cost storage solution by encoding images as strings to bypass Firebase storage limitations. Features include recipe import, serving size adjustment, and intelligent meal planning.

Stack: Kotlin, Jetpack Compose, Room Database, Firebase

OptiPropose — AI-Powered SaaS Proposal Generator

Smart proposal co-pilot that analyzes project requirements and generates persuasive, data-backed proposals with AI-driven content generation. Domain secured at optipropose.com. Currently in active development with focus on win-rate optimization algorithms.

Stack: React, Node.js, TypeScript, PostgreSQL, Firebase

CERTIFICATIONS

Meta Social Media Marketing Certificate • Python Programming (Basic) — Bizmarrow Technology
